

**They're attracted to food.  
They're attracted to light.  
They're attracted to other flies.**

## **The Insect Inn IV™ is their fatal attraction.**

***Insect Inn IV is the inconspicuous fly control system that works.***

The Insect Inn IV by Paraclipse is the latest, most ingenious fly trapping system to come along in years.

The wall mounted unit doubles as an attractive, decorative light fixture, combining ultraviolet light, special attractants to lure flies, and an exclusive auto advance replaceable cartridge.

Insect Inn IV - Without poison or electrocution, the effective, environmentally safe way to control flies.

**Flies love  
it to death.**

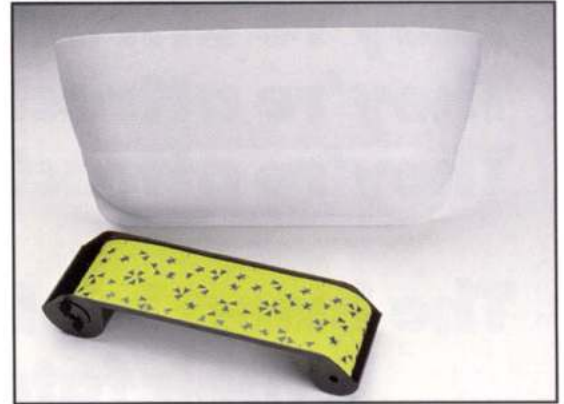

# Insect Inn IV™ — Fatal attraction for flying insects.

## FEATURES

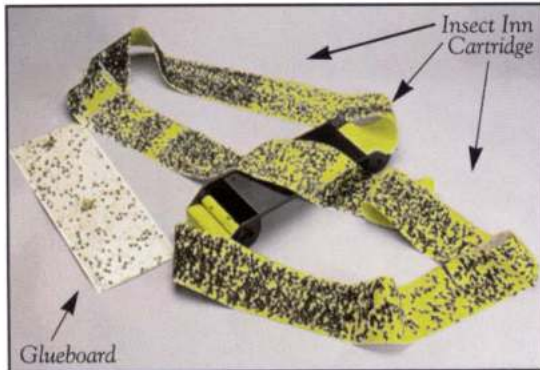

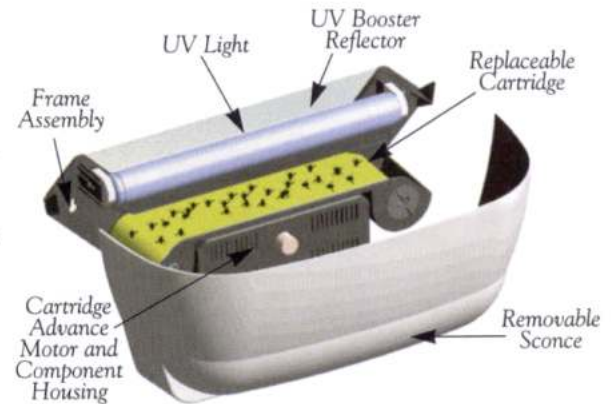

- Research-proven, flying insect-attracting UV light device
- Exclusive automatic advance 45 day cartridge trapping system
- Large capacity disposable cartridge
- Highly effective combination of special UV light, attractants, and trapping surface
- Stylish unit can be placed in public areas
- The trapping system is environmentally friendly—unit has been designed for use in food handling areas, and meets applicable guidelines.
- Easy to maintain, easy to clean
- Unique cartridge placement—directly under bulb
- Ultraviolet Bulb Booster Reflector

## BENEFITS

- Effective attraction of flying insects already inside the building
- Eliminates large quantities of flies. Sanitary handling
- Holds up to 10 times the capacity of glue boards
- Draws flying insects to trapping surface—keeps them trapped
- Your customers never know it's a flying insect trap
- No hazards to your customers from chemicals or unsanitary scatter of insect parts
- Effective flying insect control that doesn't make extra work for you or your staff
- Flies more quickly caught during random flight near bulb  
Cartridge warmed from beneath—draws more flies to catch surface
- Increases the outward reflective power of the UV bulb

*Insect Inn IV looks like a modern wall light. The cartridge is easy to install and remove—keeping your hands away from the sticky surface and captured insects.*

*A standard glueboard (left) simply can't match the fly-catching capacity of the cartridge in the Insect Inn IV. The Insect Inn IV cartridge has a continuously moving surface of almost 500 square inches of trapping surface. A standard glueboard has only 68 square inches. The result—The Insect Inn IV cartridge holds up to 10 times the capacity of glueboards.*

Manufactured in the U.S.A. by Paraclipse, Inc.
